Homepage: <https://chen20191020.github.io/ChenQian>

**OBJECTIVE** I am actively applying for doctoral programs in Statistics, Data science, and Econ & Stats for Fall 2023.

**EDUCATION** **University of California, Davis** **Davis, CA**  
M.S. [Statistics](#) (*GPA*: 3.92) *Sep.2021 - Jun.2023*

**Complutense University of Madrid** **Madrid, MAD**  
B.S. Applied Statistics (*GPA*: 3.6) *Sep.2016 - Jul.2020*  
Advisor: [Enrique Gonzalez Aranguena](#)  
Thesis: A comparison of Box-Jenkins ARIMA models and Artificial Neural Network models for financial time series.

**RESEARCH INTEREST**

- Time Series Analysis (Stationary, Non-stationary, Nonlinear)
- Machine Learning(RNN, LSTM, BERT)
- Bootstrapping
- Functional Data Analysis

**RESEARCH EXPERIENCE** **University of California, Davis** **Davis, CA**  
**Independent Research** *Jun.2022 - Present*

**Supervisor: [Xiucui Ding](#)**

- Created 'Sie2nts' R package (Sieve method for non-stationary time series; Multiplier Bootstrap for high dimensional stability test) based on [[Paper](#)]. Available at [[Sie2nts](#)]
- Provided tables of scaling function for Daubechies 1-20, Coiflet 1-5 Generated by Cascade algorithm; Wrote a user's guide for 'Sie2nts'. Available at [[Guide](#)].

**Complutense University of Madrid** **Madrid, MAD**  
**Thesis Research** *Jan.2020 - Jul.2020*

**Supervisor: [Enrique Gonzalez Aranguena](#)**

- Compared the forecasting ability of ARIMA and 2 layers LSTM models for financial time series in long and short periods based on MAPE and MdAPE.[[Link](#)]

<b>TEACHING EXPERIENCE</b>	<b>University of California, Davis</b>	<i>Davis, CA</i>
	Teaching Assistant Supervisor: <a href="#">Shizhe Chen</a> <ul style="list-style-type: none"><li>• <a href="#">STA207</a>: Statistical Methods for Research II (Winter 2023). Topics are related to linear and nonlinear statistical models.</li></ul>	<i>Jan.2023 - Mar.2023</i>
<b>INDUSTRY EXPERIENCE</b>	<b>Zhongyu Tech (mobile game)</b>	<i>Wuhan, China</i>
	Data Scientist <ul style="list-style-type: none"><li>• Promoted the company to establish the data center team, formulated data-driven solutions to help the company's product decision-making.</li><li>• Designed experiments to evaluate and monetize selected features for top100(Spring 2021) game "Wheel Offroad 3D"; Improved retention rate by cohort analysis.</li><li>• Constructed ETL procedure for mobile game data provided by Sensor-Tower and Performed Exploratory data analysis.</li><li>• Wrote weekly reports and delivered on the dashboard to aid other partners in design and engineering using.</li><li>• Optimized features of RFM model and K-means algorithm to create user cohort for "Wheel Offroad 3D".</li></ul>	<i>Sep.2020 - May.2021</i>
<b>PROJECTS</b>	<b>Predicting Acute Aquatic Toxicity by QSAR model</b>	
	Supervisor: <a href="#">Debashis Paul</a> <ul style="list-style-type: none"><li>• Used chemicals data to develop a multi-linear regression and kNN model to predict the LC50 96 hours for the fathead minnow(Cooperated with <a href="#">Le Chen</a>).[<a href="#">Report</a>, <a href="#">Slides</a>]</li></ul>	
	<b>Forecasting of COVID-19 endpoints in US, Spain and Canada</b>	
	Supervisor: <a href="#">Shizhe Chen</a> <ul style="list-style-type: none"><li>• Built features for COVID-19 data to predict pandemic endpoints in 3 different countries using Bidirectional LSTM and compared results based on experiment design.[<a href="#">Report</a>]</li></ul>	
	<b>Causal study in mobile game industry</b>	
	<ul style="list-style-type: none"><li>• Wrote annual report with content of the seasonality analysis of game market and causal study between big events and mobile game downloads (Language: Mandarin, Cooperated with <a href="#">ChengJun Zhang</a>).[<a href="#">Slides</a>]</li></ul>	
<b>COURSES</b>	<b>University of California, Davis</b>	
	<ul style="list-style-type: none"><li>• <b>Stats, DS, CS</b>: Probability Theory (Miles Lopes), Statistical Inference (Can Le), Statistical Methods and Research (Jie Peng, Shizhe Chen), Applied Time Series (Xiucai Ding), Data Web Technologies for Data Analysis (Duncan Temple Lang), Multivariate Data Analysis, Statistical Data Science</li></ul>	

- **Planned:** Optimization for Big Data Analytics (Mina Karzand), Applied Statistics (D. Paul), Generalized Linear Models (H. Mueller), Independent Research (Xiucan Ding)

#### Complutense University of Madrid

- **Stats, Math:** Probability Theory and Stochastic Processes, Statistical Estimation(Inference), Optimization Techniques, Survey Sampling, Design of Experiments, Multidimensional Analysis, Simulation and Queuing Systems, Linear Linear Prediction Methods, Industrial Applied Statistics, Time Series, Survival Analysis
- **DS, CS:** Programming I & II(C++), Statistical Software I(SAS), Statistical Software II(R), Computational Methods for Mathematics(Matlab), Database Design, Data Cleaning, Data Structures and Algorithms

<b>HONORS</b>	<b>The Honours</b> (The top student in 10 courses at Complutense)	<i>2016-2020</i>
	<b>Top performance</b> (in M.S. Comprehensive Exam at UC Davis)	<i>2022</i>
<b>SKILLS</b>	<b>programming:</b> Python, R, MySQL, C++, SAS, Matlab <b>Languages:</b> English(fluent), Spanish(advanced), Mandarin(native) <b>Certificates:</b> <a href="#">Machine Learning</a> (Coursera)
